DOOR MANUFACTURER

## U.V. FINISHING SYSTEM

---

- Characteristics equivalent to or better than AWI TR-6 and OP-6
- Semi-filled appearance
- Satin sheen between 30 to 35 degrees
- Roller coat system allowing stain to penetrate deep into the wood pores creating that deep rich look
- 100% polyurethane solids, in comparison TR-2 catalyzed lacquer with 28% and TR-6 catalyzed polyurethane with 57%
- Environmentally safe, or green product (.444 grams per liter of v.o.c. – volatile organic compounds – content for TR-6 catalyzed polyurethane compared to the standard 5.7 grams per liter of v.o.c. content)
- Non-yellowing formula stays clear
- A hard durable finish
- Solvent resistant
- Wear and moisture resistant
- Cold check resistant
- Impact resistant (1 lb. steel ball at 17 inches)
- Print resistant
- Chemical resistant (most common chemicals found in homes or offices)
- Automatic lifetime warranty (excluding hollow core doors and R/C – rotary cut – good birch)
